

## About Katvig

Katvig is smart clothes for small sizes we can vouch for and be proud of. Both because it gets kids of all ages to feel comfortable, and because it makes us and all those we work with feel comfortable.

From working with the smallest to the largest sewing fabric roll we constantly question ourselves. How do we make our organic clothes even better? How do we optimise material usage, so we do not waste ? How can we recycle? How can we protect the environment and help to make our planet greener? These are the questions we ask ourselves everyday.

Another environment that is close to our heart is the work environment. Whichever part of Katvig chain our suppliers contributes to we prioritise orderly conditions with respect for the individual.

Katvig is good style throughout and made to be used and inherited. Our quality is unique, and the the clothes can withstand being washed again and again when the summer's first strawberries, a long day on the playground or the finger paint class leaves its traces.

Children should have the freedom to be children and we must give them the best conditions to unfold. Now and in the future.
